With Your Support

With your support, Brains Together for a Cure has been able to fund the following:

- A symposium for patients and caregivers
- A support group for patients and caregivers (meets monthly at the Hope Lodge)
- Numerous research projects, investigating the following brain tumor topics:
 - Tumor detection using specialized PET scans with MRIs (resulted in a National Cancer Institute grant that funded two clinical trials)
 - Various methods to break through the blood brain barrier
 - Blocking STAT3 proteins critical for tumor growth (two patents pending based on this research)
 - Blocking the autophagy stage of tumor growth to kill cancer cells in medulloblastomas
 - Effects of radiation on neuro-cognitive decline and quality of life
 - Efficacy of combined anti-angiogenic therapy and immunotherapy
 - Immunosuppression in glioma patients, considering substances to reverse it
